Administration

Since 2010, Federal agencies have saved time and money through sole-source awards to FedSync. With a steadily growing list of past performance (including CPARS ratings), FedSync has earned the reputation for exceeding customer expectations across a wide range of requirements. The 8(a) acquisition process is efficient with contracts being able to be awarded in days, rather than months.

Why Choose FedSync?

Contracting Advantages

Sole Source Contracts with the SBA 8(a) Program – up to \$4 Million | Direct Award Task Orders against GSA 8(a) STARS II – up to \$4 Million and No Protests up to \$10 Million

Experienced | Competitive Rates | Quality Management Systems

Past Performance

Customer	Performance
General Services Administration (GSA)	FedSync has been supporting the GSA since 2016 in CFO Office support for various Financial Management needs, including; data entry into financial systems; financial analysis and research; compilation and preparation of financial documentation; maintaining and reconciling accounts; performing account close out procedures; preparing reports and statements; designing, developing, operating, or inspecting accounting systems; prescribing accounting standards, policies, and requirements; examining, analyzing and interpreting accounting data; and assisting management on accounting and financial management matters.
Federal Motor Carrier Safety Administration (FMCSA)	FedSync is providing a wide range of Financial, Budget, HR, and Administrative support services to the Offices of FMCSA. FedSync transitioned 100% of the available incumbent personnel and added new personnel to the contract within 30 days of contract initiation. The contract is a critical mission support vehicle for the FMCSA as many directorates depend on the support personnel for achieving the objectives set out by the Administrator and Secretary. The contract has over 20 personnel and includes two (2) subcontractors.
Department of The Interior (DOI)	For this extremely important support contract for the DOI, FedSync and team provides the following services: Develop and implement technical solutions, utilizing existing security hardware and software; Research and evaluate technologies to enhance security controls; Recommend enhancements to network security hardware, software, processes, and procedures; Implement procedures and processes to provide management reporting of the effectiveness of network security controls; Provide technical expertise in security incident response; Monitor alerts from DOI security systems to identify security incidents on DOI network and systems; Performing network and system forensics; Provide Security Continuous Monitoring for DOI IT systems; Expertise in supporting Federal and Security audits and assessments.

Who We Are

FedSync is a DC region 8(a) vendor supporting Federal agencies CONUS. FedSync is ISO 9001:2015 registered and has executive corporate team members with combined over 100+ years of Federal / DoD / Intelligence support experience. With over 10 simultaneous projects across multiple states and multiple disciplines, we can manage complex requirements and deliver exceptional results. We provide professional support services in areas of Financial Management, Acquisition, Procurement,

Administration, Cybersecurity, HR, Database Management; Information Technology; Data Intelligence; and Project and Program Management Office support. FedSync is a customer centered, talent focused and highly responsive firm. FedSync combines the agile, responsive infrastructure of a small firm with proven executive leadership to ensure timely, high quality, and best-value contract execution.
